

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-7 (Canceled).

Claim 8 (New): A polyurethane composition comprising:

(A) a urethane compound prepared by reacting 100 parts by weight of a polyol with a polyisocyanate such that the NCO/OH equivalent weight ratio is greater than 0.5 but less than 15, and

(B) a linear inner olefin having 6 to 30 carbon atoms,

wherein the content of said compound (B) per 100 parts by weight of said polyol is greater than 5 parts by weight but less than 400 parts by weight.

Claim 9 (New): The polyurethane composition of claim 8, wherein the linear inner olefin having 6 to 30 carbon atoms for said compound (B) is any one of 2-octadecene, 3-octadecene, 4-octadecene, 5-octadecene, 2-eicosene, 3-eicosene, 4-eicosene and 5-eicosene.

Claim 10 (New): A polyurethane composition comprising:

(A) a urethane compound prepared by reacting 100 parts by weight of a polyol with a polyisocyanate such that the NCO/OH equivalent weight ratio is greater than 0.5 but less than 15, and

(B) an epoxidation product of a dimer of a linear olefin compound having 6 to 30 carbon atoms,

wherein the content of said compound (B) per 100 parts by weight of said polyol is greater than 5 parts by weight but less than 400 parts by weight.

Claim 11 (New): The polyurethane composition of claim 10, wherein the epoxidation product of a dimer of a linear olefin compound having 6 to 30 carbon atoms for said compound (B) is any one of 2-butyl-hexyloxirane, 2-hexyl-2-octyloxirane, 2-decyl-2-octyloxirane, 2-decyl-2-dodecyloxirane, 2-dodecyl-2-tetradecyloxirane and 2-hexadecyl-2-tetradecyloxidane.

Claim 12 (New): A molded article prepared by molding the polyurethane composition of claim 8.

Claim 13 (New): A molded article prepared by molding the polyurethane composition of claim 10.

Claim 14 (New): A polyurethane composition comprising
(A) a urethane compound prepared by reacting 100 parts by weight of a polyol with a polyisocyanate such that the NCO/OH equivalent weight ratio is greater than 0.5 but less than 15, and

(B) an oligomer formed of 2 to 8 molecules of a linear olefin compound having 6 to 30 carbon atoms,

wherein the content of said compound (B) per 100 parts by weight of said polyol is greater than 5 parts by weight but less than 400 parts by weight.

Claim 15 (New): The polyurethane composition of claim 14, wherein the oligomer formed of 2 to 8 molecules of a linear olefin compound having 6 to 30 carbon atoms for said compound (B) is an oligomer formed of 2 to 4 molecules of a linear olefin compound having 10 to 15 carbon atoms.

Claim 16 (New): The polyurethane composition of claim 15, wherein the oligomer formed of 2 to 4 molecules of a linear olefin compound having 10 to 15 carbon atoms is any one of 2-butyl-1-octene, 2-hexyl-1-decene, 2-octyl-1-dodecene, 2-decyl-1-tetradecane, 2-dodecyl-1-hexadecane, 2-tetradecyl-1-octadecane, a decene trimer, a decene tetramer, a dodecene trimer, a dodecene tetramer, a tetradecene trimer, and a tetradecene tetramer.

Claim 17 (New): A molded article prepared by molding the polyurethane composition of claim 14.
